### Applications&Description

- \* Schedule 40 PVC Pipes is designed for infrastructure or superstructure applications and have 50+ years service life.
- \* Used for Electrical Conduit, Power Duct, concrete encasements, and direct burials, as well as telephone applications.
- \* They are available in 1/2- to 8-inch diameters, in 10- and/or 20-foot lengths

### Benefits

- \* products are light-weight, cost-effective and long-life.
- \* They can be field-cut with a power saw or ordinary handsaw
- \* Easy to load, transport and handle, installers prefer them because they go into the ground quickly, saving installation cc
- \* The solvent-weld joints are designed to provide a rigid joint connection,
- \* PVC material corrosion, rust and sunlight resistant
- \* Sunlight Resistant
